Sensitivity: Confidential

As I understood the situation from Mark and Mary, there was no need for additional devices.

Candace

Megan,

Please let all know if we will have enough devices for the AA04271 study. I do not think we do. Please remember that some will need to be optical and others manual due to the JLI devices.

Jan,
At the last weekly meeting, I think that Candace stated she was going to order 150 devices. Please advise.

Thanks
Kim

Dear Kim,

Would you please check whether or not you have enough topography devices for the JLI Menthol II study in April?

Thank you
Jan
